

CHAPTER 6

From Plan to

Action

September 2021 DRAFT

The Climate Adaptation and Hazard Mitigation Plan is a living document that must be regularly reviewed and updated. This chapter provides a roadmap for how the public will remain engaged in the plan, how the plan will be integrated into other planning processes and how it will be maintained and updated over time. The plan will undergo a comprehensive revision and update before the expiration of this 5-year plan.

Continued Public Involvement

Public participation is an integral component of the mitigation planning process and will continue to be essential as this Plan evolves and is updated over time. The most appropriate and meaningful opportunities for the general public to be involved in the maintenance and implementation of the Plan is during the five-year plan review process as described earlier in this section. As demonstrated in **Appendix A**, the City was diligent and successful in providing public involvement opportunities during this five-year plan review process through multiple methods. While the five-year plan review process represents the greatest opportunity for input on the Plan, the City intends to do hazard mitigation outreach and education during the interim periods, which may promote a more engaged citizenry for the five-year update process.

Integration into Other Planning Processes

The City Manager's Office will be responsible for maintaining this Plan as a living document, which interacts with other City and Regional planning documents. As various City and regional they will incorporate the data and strategies in this plan into their planning processes. The construction of new infrastructure or completion of mitigation programs, will be also be tracked for inclusion in the subsequent update of the Plan.

Plan Maintenance and Update Process

The Climate Adaptation and Hazard Mitigation Plan is a living document that must be regularly reviewed and updated. Public participation is an integral component of the mitigation planning process and will continue to be essential as this Plan evolves and is updated over time.

The City Manager's Office will be charged with maintaining, evaluating and updating this Plan on an annual basis within the 5-year cycle. Progress on Plan implementation will be reported to City Council at a public meeting annually, coincident with the annual report of the Climate Action and Resiliency Plan.

Per federal regulations, this plan must be updated every five years. The City Manager's Office will ensure that a complete review and update of the Plan, including the hazard analysis and mitigation strategy, is completed before the expiration of the current Plan. The plan update process will follow much the same process as followed in the 2021 update.
