

Alameda Troop 2 **Ryan Liu**

SOLAR WALK Eagle Project

Benefitting Alameda Parks and Recreation Department

I am creating a ~2.7 mile Solar Walk that will stretch along Alameda's Shoreline Park as my Eagle Scout project to promote the outdoors as well as STEM learning in our community. This project will create 9 separate signs that will be spaced to reflect the relative distance between each planet and the sun in our Solar System (at a 1000x scale). Each sign will contain a distance marker showing how the relative distance and scaled distance the reader has traveled from the Sun, information about the particular planet (diameter, day length, year length, etc.) and some fun facts about the planet too!

I am currently raising funds needed to create the signs. If you are able to help financially support this project, all donations are welcome. I have set up a GoFundMe account to accept project donations. All proceeds benefit ARPD.
