Scope of work: Demolition of falling-down rear garage / workshop (build in 1937), single story, wooden structure plus demo of small stand alone 8'x10' shed.

There are no utilities in these structures. There is no asbestos in these structures. The garage/workshop is raw wood.

We just got approval from the Bay Area Air Quality Management District. Our J Number is: ASB137474

I am applying for a "Certificate of Approval" through the Planning App to demo this building as it is assigned an "S" (historic) rating.

I personally inspected the garage/workshop and it is in very poor condition. The roof has failed and the walls are leaning. The main structural beam has been temporarily reinforced with 2x lumber. It is my opinion that this structure is beyond salvageable.
