

2025  
**ANNUAL  
MILITARY  
EQUIPMENT  
REPORT**

**ALAMEDA POLICE  
DEPARTMENT**

---

1555 Oak Street • Alameda, CA • 94501

# EXECUTIVE SUMMARY

Effective January 1, 2022, Assembly Bill 481 (AB 481) requires:

1. A law enforcement agency to obtain approval from its governing body to enact a Military Equipment Use Policy by ordinance before purchasing, using, raising funds for, or acquiring military equipment; and
2. A law enforcement agency to submit to the governing body an annual military equipment report for each type of military equipment approved by the governing body for as long as the military equipment is available for use.

The City of Alameda (City) Police Department (APD) is submitting this report to educate the community, report to the City Council, and comply with the requirements outlined in AB 481.

APD has publicized a community engagement meeting to be held on April 9, 2026, to discuss this report and to field questions from the community regarding the funding, acquisition, and use of military equipment.

# BACKGROUND

On July 7, 2022, the City Council reviewed an APD draft policy and approved APD's Military Equipment Use Policy. This action allowed APD to continue using the equipment and allowed neighboring police agencies to use military equipment within our jurisdiction when providing mutual assistance during exigent circumstances. On March 4, 2024, the City Council approved a revision to APD's Military Equipment Use Policy. (See Exhibit 1)

# MANDATED REPORTING CATEGORIES

AB 481 specifies that the Annual Military Equipment Report includes six main categories:

1. A summary of how the military equipment was used and the purpose of its use.
2. A summary of any complaints or concerns received concerning the military equipment.
3. The results of any internal audits, any information about the violation(s) of the Military Equipment Use Policy, and any actions taken in response.
4. The total annual cost for each type of military equipment, including acquisition, personnel, training, transportation, maintenance, storage, upgrade, and other ongoing costs, and from what source funds will be provided for the military equipment in the calendar year following submission of the annual military equipment report.
5. The quantity possessed for each type of military equipment.
6. If the law enforcement agency intends to acquire additional military equipment in the next year, the quantity sought for each type of military equipment.

See Government Code § 7072(a).

## HOW THE MILITARY EQUIPMENT WAS USED AND THE PURPOSE OF ITS USE

In 2025, there were a total of 16 deployments of different equipment. In summary, there were two use/deployments of the Emergency Response Vehicle (ERV) and 14 use/deployments of the Crewless Air Vehicle (Drone). Below are all deployments in chronological order with incident specifics

1. **25-01112:** The US Marshals Service Fugitive Task Force requested the use of the ERV to conduct an arrest/search warrant.
2. **25-01625:** Alameda Police personnel deployed a Drone to assist in the search for a suspect who fled from an enforcement stop.
3. **25-01955:** Alameda Police personnel deployed a Drone to assist in locating a felony suspect.
4. **25-02187:** Alameda Police personnel deployed a Drone to assist in the search for a suspect who brandished a weapon.
5. **25-02422:** Alameda Police personnel deployed a Drone to assist in locating a stolen vehicle and suspect.
6. **25-02496:** Alameda Police personnel deployed a Drone to assist in locating a missing juvenile.
7. **25-02673:** Alameda Police personnel deployed a Drone to assist in the search for an assault suspect.
8. **25-02949:** Alameda Police personnel deployed a Drone to locate a stolen vehicle and suspect.
9. **25-03582:** Alameda Police personnel deployed a Drone in support of the Alameda Fourth of July Parade.
10. **2507040010:** Alameda Police personnel staged the ERV in support of the Alameda Fourth of July Parade.
11. **25-03734:** Alameda Police personnel deployed a Drone after receiving a shots-fired call at a large public gathering.
12. **25-04368:** Alameda Police personnel deployed a Drone in support of a search warrant operation.
13. **25-05769:** Alameda Police personnel deployed a Drone to assist in the search of an at-risk missing person.

14. 25-05858: Alameda Police personnel deployed a Drone to assist in locating a suspect who brandished a weapon.
15. **25-06298**: Alameda Police personnel deployed a Drone to assist the California Highway Patrol, who were searching for an armed wanted suspect.
16. **2512290061**: Alameda Police personnel deployed a Drone after receiving a report of an explosion on the roof of a building.

# COMPLAINTS, CONCERNS AND AUDIT

## **COMPLAINTS OR CONCERNS RECEIVED**

No complaints or comments were received through APD's website portal.

## **AUDIT RESULTS AND REPORTS OF VIOLATIONS OF MILITARY EQUIPMENT AND ACTIONS TAKEN**

An equipment audit was completed in January 2026, and all equipment was accounted for and confirmed to be in its assigned storage areas. An audit of the ERV and Drone usage was completed, and no policy or procedural violations were found.

APD received no reports of violations of military equipment.

# COST AND FUNDING

## THE TOTAL COST AND THE FUNDING SOURCE

The total cost associated with military equipment in 2025 was \$209,332.08.

- Maintenance and emissions testing for the ERV: \$ 589.41
- Purchase of .223 ammunition: \$ 16,236.67
- Purchase of .308 ammunition: \$ 0
- Training associated with Drones: \$ 106,065.00
  - APD personnel collectively received 715 hours of training. 9 Officers trained for 555 hours, and 2 sergeants trained for 160 hours. Personnel also attended a training class that cost \$3,225.00
- Purchase of Drone equipment: \$0
- Training on the handling and use of semi-automatic rifles\*: \$ 83,216.00
  - APD personnel collectively received 580 hours of training. SWAT Personnel, consisting of five officers and three sergeants, collectively trained for 210 hours, while all other in-service sworn personnel, consisting of 49 officers and seven sergeants, collectively trained for 370 hours.

\*Accounting for training costs is fluid, as personnel, their ranks, and assignments change throughout the year. Costs were calculated using a total compensation rate of \$136.00 per hour for officers and \$171.00 per hour for sergeants

# QUANTITIES AND INTENT TO ACQUIRE

## **QUANTITIES OF EACH TYPE OF MILITARY EQUIPMENT**

An equipment inventory is attached to this report. (See Exhibit 3)

## **INTENT TO ACQUIRE ADDITIONAL MILITARY EQUIPMENT**

APD intends to acquire .223-caliber and .308-caliber ammunition to replenish inventory and conduct required training. APD also intends to purchase 40mm foam projectiles for training at the police academy and incidents requiring less-lethal options, and noise-flash diversionary devices for in-service SWAT training and operations.

APD also intends to purchase two new drones to supplement our drone program and six new 40mm single-shot launchers to replace our patrol less-lethal shotgun program. (See Exhibit 3) If the 40mm single-shot launchers are approved, the less-lethal shotguns will be removed from service. The purchase of the Drones, 40 mm launchers, and ammunition will be covered by existing department funds.

## Military Equipment

709.1 PURPOSE AND SCOPE The purpose of this policy is to provide guidelines for the approval, acquisition, and reporting requirements of military equipment (Government Code § 7070; Government Code § 7071; Government Code § 7072).

### 709.1.1 DEFINITIONS

Definitions related to this policy include (Government Code § 7070):

Governing body – The elected or appointed body that oversees the Alameda Police Department.

Military equipment – Includes but is not limited to the following:

- Unmanned, remotely piloted, powered aerial or ground vehicles.
- Mine-resistant ambush-protected (MRAP) vehicles or armored personnel carriers.
- High mobility multipurpose wheeled vehicles (HMMWV), two-and-one-half-ton trucks, five-ton trucks, or wheeled vehicles that have a breaching or entry apparatus attached.
- Tracked armored vehicles that provide ballistic protection to their occupants.
- Command and control vehicles that are either built or modified to facilitate the operational control and direction of public safety units.
- Weaponized aircraft, vessels, or vehicles of any kind.
- Battering rams, slugs, and breaching apparatuses that are explosive in nature. This does not include a handheld, one-person ram.
- Firearms and ammunition of  $.50$  caliber or greater, excluding standard-issue shotguns and standard-issue shotgun ammunition.
- Specialized firearms and ammunition of less than  $.50$  caliber, including firearms and accessories identified as assault weapons in Penal Code § 30510 and Penal Code § 30515, with the exception of standard-issue firearms.
- Any firearm or firearm accessory that is designed to launch explosive projectiles.
- Noise-flash diversionary devices and explosive breaching tools.
- Munitions containing tear gas or OC, excluding standard, service-issued handheld pepper spray.
- Area denial electroshock devices, microwave weapons, water cannons, long-range acoustic devices (LRADs), acoustic hailing devices, and sound cannons.
- Kinetic energy weapons and munitions.
- Any other equipment as determined by a governing body or a state agency to require additional oversight.

# Alameda Police Department

Alameda Police Department Policy Manual

## *Military Equipment*

---

### **709.2 POLICY**

It is the policy of the Alameda Police Department that members of this department comply with the provisions of Government Code § 7071 with respect to military equipment.

### **709.3 MILITARY EQUIPMENT COORDINATOR**

The Chief of Police should designate a member of this department to act as the military equipment

coordinator. The responsibilities of the military equipment coordinator include but are not limited to:

(a) Acting as liaison to the governing body for matters related to the requirements of this policy.

(b) Identifying department equipment that qualifies as military equipment in the current possession of the Alameda Police Department, or the equipment the Alameda Police Department intends to acquire that requires approval by the governing body.

(c) Conducting an inventory of all military equipment at least annually.

(d) Collaborating with any allied agency that may use military equipment within the jurisdiction of Alameda Police Department (Government Code § 7071).

(e) Preparing for, scheduling, and coordinating the annual community engagement meeting to include:

1. Publicizing the details of the meeting.

2. Preparing for public questions regarding the department's funding, acquisition, and use of equipment.

(f) Preparing the annual military equipment report for submission to the Chief of Police and ensuring that the report is made available on the department website (Government Code § 7072).

(g) Establishing the procedure for a person to register a complaint or concern, or how that person may submit a question about the use of a type of military equipment, and how the Alameda Police Department will respond in a timely manner.

### **709.4 MILITARY EQUIPMENT INVENTORY**

The following constitutes a list of qualifying equipment for the Alameda Police Department:

Crewless, Remotely Piloted, Powered Ground Vehicle

Armored Personnel Carrier, Vehicle with Entry Apparatus Attached

Specialized Firearms and Ammunition

Noise Flash Diversionary Devices

Munitions Containing Tear Gas

Kinetic Energy Weapons and Munitions

[See attachment: Military Equipment Inventory.pdf](#)

## *Military Equipment*

---

### **709.5 APPROVAL**

The Chief of Police or the authorized designee shall obtain approval from the governing body by way of an ordinance adopting the military equipment policy. As part of the approval process, the Chief of Police or the authorized designee shall ensure the proposed military equipment policy is submitted to the governing body and is available on the department website at least 30 days prior to any public hearing concerning the military equipment at issue (Government Code § 7071). The military equipment policy must be approved by the governing body prior to engaging in any of the following (Government Code § 7071):

- (a) Requesting military equipment made available pursuant to 10 USC § 2576a.
- (b) Seeking funds for military equipment, including but not limited to applying for a grant, soliciting or accepting private, local, state, or federal funds, in-kind donations, or other donations or transfers.
- (c) Acquiring military equipment either permanently or temporarily, including by borrowing or leasing.
- (d) Collaborating with another law enforcement agency in the deployment or other use of military equipment within the jurisdiction of this department.
- (e) Using any new or existing military equipment for a purpose, in a manner, or by a person not previously approved by the governing body.
- (f) Soliciting or responding to a proposal for, or entering into an agreement with, any other person or entity to seek funds for, apply to receive, acquire, use, or collaborate in the use of military equipment.
- (g) Acquiring military equipment through any means not provided above.

### **709.6 COORDINATION WITH OTHER JURISDICTIONS**

Military equipment should not be used by any other law enforcement agency or member in this jurisdiction unless the military equipment is approved for use in accordance with this policy.

### **709.7 ANNUAL REPORT**

Upon approval of a military equipment policy, the Chief of Police or the authorized designee should submit a military equipment report to the governing body for each type of military equipment approved within one year of approval, and annually thereafter for as long as the military equipment is available for use (Government Code § 7072).

The Alameda Police Department will send a notification of the use of military equipment per policy

358.5. After City Council is notified, the Alameda Police Department will ensure that a summary of each use of AB 481 equipment is published on the Department's website within 60 days. The Chief of Police or the authorized designee may extend any or all notifications to protect the integrity of a criminal or administrative investigation.

The Chief of Police or the authorized designee should also make each annual military equipment report publicly available on the department website for as long as the military equipment is

# Alameda Police Department

Alameda Police Department Policy Manual

## *Military Equipment*

---

available for use. The report shall include all information required by Government Code § 7072 for the preceding calendar year for each type of military equipment in department inventory.

### **709.8 COMMUNITY ENGAGEMENT**

Within 30 days of submitting and publicly releasing the annual report, the Alameda Police Department shall hold at least one well-publicized and conveniently located community engagement meeting, at which the Alameda Police Department should discuss the report and respond to public questions regarding the funding, acquisition, or use of military equipment.

1. Crewless, remotely piloted, powered ground vehicle (Category 1)

a. Description, and Capabilities

Robotex Avatar robot is a remote controlled, crewless machine that operates on the ground. It is used to enhance the safety of the community and officers. It is a heavy-duty robot. The robot has stair climbing ability, and an arm capable of lifting 65lbs. The robot offers multiple communications options, and a chassis that allows for accessories and tool combinations.

b. Purpose

To be used in remotely gaining visual/audio data, deliver portable phones, open doors, move suspicious packages, and clear buildings. The device improves scene intelligence allowing officers to be away from dangerous areas in safer places.

c. Authorized Use

The robot is only used in incidents where officers have the legal authority to search or be in the location where the robot is used and it is approved by the Watch Commander.

d. Expected Lifespan

10 Plus years.

e. Fiscal Impact

The robot was acquired in 2013 with grant funds for \$25,000. Annual maintenance cost is estimated between \$0 and \$5000 depending on the serviceability of the battery.

f. Training

All robot operators must complete the basic SWAT Operator Course prior to operating or using the robot.

g. Legal and Policy Rules

Use is established under Policy 408. The robot is to be used for official law enforcement purposes and according to State and Federal Law.

2. Armored Personnel Carrier, vehicle with entry apparatus attached (Category 2)

a. Description, and Capabilities

Ballistic Armored Tactical Transport (BATT) Emergency Response Vehicle (ERV). The vehicle is built on a 2012 Ford F-550 chassis. The ERV is designed to provide ballistic protection during tactical events while withstand multiple bullet strikes from small arms fire, equipped with emergency lights/siren and a public address system.

b. Purpose

To be used in response to critical incidents to enhance officer and community safety, improve scene containment and stabilization, assist in resolving critical incidents. Uses for the ERV include resident and officer rescues, evacuations, and the deployment of officers and approved equipment. The vehicle has detachable breaching apparatus, which can be affixed to the front bumper. The vehicle can be used as a de-escalation apparatus that allows close, safe, contact with armed suspects. The breaching apparatus can assist in entry where handheld tools are inadequate or ineffective for barricaded individuals.

c. Authorized Use

The use of armored vehicles shall only be authorized by a Watch Commander based on the specific circumstances of a given critical incident.

d. Expected Lifespan

25 years.

e. Fiscal Impact

The ERV was originally purchased in 2012 with general fund money for \$250,000.

The estimated annual maintenance cost is between \$0 and \$1000 depending on scheduled maintenance and serviceability. .

f. Training

The Emergency Response Vehicle shall be deployed only by officers trained in its specific use and in a manner consistent with Department policy and training. All

officers are required to go through training every other year in emergency vehicle operations per POST regulations.

g. Legal and Policy Rules

Use is established under APD Policy 409. It is the policy of the Department to utilize the Emergency Response Vehicle only for official law enforcement purposes and according to State and Federal Law.

3. Specialized Firearms and Ammunition (Category 9)

a. Description, and Capabilities

i. Colt, AR-15 carbine rifles, capable of accurately stopping an armed subject at various distances. The Colt AR-15 carbine rifle is a shoulder-fired weapon designed for semi-automatic fire chambered in 5.56 NATO/ Remington .223. They are outfitted with lighting devices to boost safety and electronic sighting devices to enhance ease of use and accurate fire.

ii. Bushmaster carbine rifles. These rifles are nearly identical to the to the Colt carbines, but have shorter barrels. These were purchased for the SWAT team leaders who needed more maneuverability to control the tactical operators during SWAT operations.

iii. ArmaLite 10 semi-automatic rifles. These firearms are chambered in .308 Winchester. The rifles are built on a similar platform as the Colt rifles but have greater stopping power. These rifles are primarily used in an over watch capacity to protect the community and officers during large events and in tactical situations where it might be necessary to incapacitate vehicles intentionally being used as weapons. These weapons are outfitted with scoped optics designed for precision accurate delivery of the bullets.

b. Purpose

To be used as precision weapons to address a threat with more accuracy and/or at greater distances than a handgun. To defeat body-armor worn by suspects who engage in violence and to stop on going threats that cannot be handled with handgun munitions.

c. Authorized Use

i. Patrol rifles can be deployed in any circumstance where an officer can

articulate a reasonable expectation that the rifle may be needed and in accordance with Policy 312.3.2. Examples of some general guidelines for deploying the patrol rifle may include but are not limited to:

- Situations where the member reasonably anticipates an armed encounter.
  - When a member is faced with a situation that may require accurate and effective fire at long range.
- Situations where a member reasonably expects the need to meet or exceed a suspect's firepower.
- When a member reasonably believes that there may be a need to fire on a barricaded person or a person with a hostage.
- When a member reasonably believes that a suspect may be wearing body armor.
- When authorized or requested by a supervisor.
- When needed to euthanize an animal.

ii. Bushmaster carbine rifles can be deployed in any circumstance where an officer can articulate a reasonable expectation that the rifle may be needed and in accordance with Policy 312.3.2. These weapons are only used by members of the tactical team.

iii. AR-10 Rifles authorized uses are similar to the patrol rifles but can only be deployed by members of the tactical team who have successfully completed POST-approved sniper training.

#### d. Expected Lifespan

- i. Colt, AR-15 - No defined expiration, but until it is no longer serviceable
- ii. Bushmaster carbine - No defined expiration, but until it is no longer serviceable
- iii. Armalite-10 – No defined expiration, but until it is no longer serviceable

#### e. Fiscal Impact

i. The patrol rifles were originally purchased in 2002 with general fund money. The approximate cost to purchase the 55 Colt rifles was \$1,200 per rifle.

ii. The Bushmaster rifles were originally purchased in 2010 with general fund money. The approximate cost to purchase the two Bushmaster rifles was \$1,500.

iii. The Armalite .308 rifles were originally purchased in 2012 with general fund money. The approximate cost to purchase the two Armalite rifles was \$1,500 per rifle.

The estimated on-going maintenance of all the firearms listed in this category is \$0-\$100 per rifle based on serviceability.

#### f. Training

Prior to using a rifle, officers must be certified by POST instructors in the operation of the rifle. Officers are then required to complete quarterly training and qualification conducted by a certified patrol rifle instructor.

#### g. Legal and Policy Rules

Policy 432 governs patrol rifle use, qualifications, and various other elements including storage. POST requires on-going training with patrol rifles bi-annually.

#### 4. Noise-flash Diversionary Devices (category 11)

##### a. Description and Capabilities

Combined Tactical Systems, 7290 Flash-bangs, which is a non-bursting, non-fragmenting bang device that produces a thunderous bang with an intense bright light. Flash bangs are ideal for distracting dangerous suspects during assaults, hostage rescue, room entries, or other high-risk arrest situations.

##### b. Purpose

A distraction device is ideal for distracting dangerous suspects during assaults, hostage rescue, room entry or other high-risk arrest situations. To produce atmospheric pressure and brilliant white light and, as a result, can cause short-term (6 - 8 seconds) physiological/psychological, sensory deprivation to give officers a tactical advantage.

##### c. Authorized Use

Diversionary Devices shall only be used:

- By officers who have been trained in their proper use.
- In hostage and barricaded subject situations.
- In high-risk warrant (search/arrest) services where there may be extreme hazards to officers.
- During other high-risk situations where their use would enhance officer safety.
- During training exercises.

##### d. Lifespan

Until used.

##### e. Fiscal Impact

These devices were purchased over 20 years ago and the on-going replenishment costs come from general fund money. The cost is \$38 per munition.

##### f. Training

Prior to use, officers must attend diversionary device training that is conducted by POST certified instructors.

##### g. Legal and Procedural Rules

Use is established under SWAT Manual. It is the policy of the APD to utilize diversion devices only for official law enforcement purposes, and pursuant to State and Federal law regarding the use of force.

#### 5. Munitions Containing Tear Gas (Category 12)

##### a. Description, and Capabilities

Various Quantities of Chemical agent munitions, which are commonly referred to as "tear gas," are used by the Alameda Police Department as a non-lethal tool to disperse rioting suspects and on barricaded individuals. The Alameda Police Department uses two chemical agents which are used by law enforcement across the United States: CS (2 Chlorobenzylidenemalononitrile) and OC (Oleoresin Capsicum).

CS is an irritating agent and lachrymator (irritates the eyes and causes tears to flow). CS has been medically tested in the UK and US, specifically by the U.S. Army. There are no known allergic reactions to CS. OC was de-regulated in California in 1996, is endorsed by the FBI, and is available to civilians to legally possess (2.5 oz. or less). OC is an inflammatory agent which causes involuntary closure of eyes (open in 2-5 minutes) and respiratory inflammation (subsides in approximately 2 minutes).

I. CS grenades emitting CS smoke for 20 to 40 seconds through gas ports located on top of the devices.

II. OC vapor aerosol grenades deliver a high concentration of OC in a powerful mist. The grenade is designed for indoor use and in confined areas.

III. OC/CS vapor aerosol grenades which deliver a high concentration combination of OC and CS in a powerful mist. The grenade is designed for indoor use in confined areas.

IV. 40mm muzzle blast OC powder dispersion rounds. This munition incorporates an aluminum shell and propels powdered OC at short ranges (no more than 30 feet).

V. 40mm muzzle blast CS powder dispersion rounds. This munition incorporates an aluminum shell and propels OC powder at short ranges (no more than 30 feet).

VI. 40mm Liquid CS barricade-penetrating projectiles. This munition incorporates a plastic shell and is launched from a 40mm launcher. The projectile contains liquid CS encapsulated in the frangible round. The projectile is designed to penetrate windows, hollow core interior doors, and thin plywood. Once fragmented, the projectile emanates the liquid CS.

VII. 40mm powder CS barricade-penetrating projectiles. This munition incorporates a plastic shell and is launched from a 40mm launcher. The projectile contains powder CS encapsulated in the frangible round. The projectile is designed to penetrate windows, hollow core interior doors, and thin plywood. Once fragmented, the projectile emanates the powdered CS.

VIII. 40mm liquid OC barricade-penetrating projectiles. This munition incorporates a plastic shell and is launched from a 40mm launcher. The projectile contains liquid OC encapsulated in a frangible round. The projectile is designed to penetrate windows, hollow core interior doors, and thin plywood. Once fragmented, the projectile emanates the liquid OC.

IX. 40mm powder OC barricade-penetrating projectiles. This munition incorporates a plastic shell and is launched from a 40 MM launcher. The projectile contains powder OC encapsulated in the frangible round. The projectile is designed to penetrate windows, hollow core interior doors, and thin plywood. Once fragmented, the projectile emanates the liquid OC.

#### b. Purpose

To limit the escalation of conflict where employment of lethal force is prohibited or unreasonable. Situations for use of the less-lethal weapon systems may include, but are not limited to:

- Dangerous and/or combative individuals.
- Barricaded wanted suspects
- Riot control.
- Circumstances where a tactical advantage can be obtained.
- Potentially vicious animals.
- Training exercises or approved demonstrations.

#### c. Authorized Use

These items are used by our tactical team operators during deployments or during riots. Only officers who have received POST certification or manufacturer-specific training in the use of chemical agents are authorized to use chemical agents within the limitations of Policy 300 and Government Code 7286(a). Reporting of any use must comply with Policy 468.13 and Penal Code 13652.1.

#### d. Training

Sworn members utilizing chemical agents or impact rounds are trained in their use by POST certified less lethal and chemical agent instructors. Further, the officers must comply with Policy 468.12.

#### e. Lifespan

- I. CS grenades, six years
- II. OC vapor aerosol grenade, five years
- III. OC/CS vapor aerosol grenade, five years
- IV. 40mm muzzle blast OC powder, five years
- V. 40mm muzzle blast CS powder, five years
- VI. 40mm Liquid CS barricade penetrating projectiles, five years
- VII. 40mm powder CS barricade penetrating projectiles, five years
- VIII. 40mm liquid OC barricade penetrating projectiles, six years
- IX. 40mm powder OC barricade penetrating projectiles, five years

#### f. Fiscal Impact

- I. CS grenades, initially acquired over 20 years ago, for approximately \$23 per munition
- II. OC vapor aerosol grenade, initially acquired over 20 years ago, approximately \$49 per munition
- III. OC/CS vapor aerosol grenade initially acquired over 20 years ago, approximately \$23 per munition
- IV. 40mm muzzle blast OC powder, initially acquired over 20 years ago, approximately \$26 per munition
- V. 40mm muzzle blast CS powder, initially acquired over 20 years ago, approximately \$26 per munition
- VI. 40mm Liquid CS barricade penetrating projectiles, initially acquired over 20 years ago, approximately \$24 per munition
- VII. 40mm powder CS barricade penetrating projectiles, initially acquired over 20 years ago, approximately \$24 per munition
- VIII. 40mm liquid OC barricade penetrating projectiles, initially acquired over 20 years ago, approximately \$25 per munition
- IX. 40mm powder OC barricade penetrating projectiles, initially acquired over 20 years ago, approximately \$25 per munition

#### g. Legal and Procedural Rules

Use is established under SWAT Manual. It is the policy of the APD to utilize specialized chemical agents only for official law enforcement purposes, and pursuant to State and Federal law regarding the use of force. Sworn members utilizing specialized chemical agents must be trained in their use by POST certified less lethal and chemical agent instructors.

## 6. Kinetic Energy Weapons and Munitions (Category 14)

### a. Description, and Capabilities

I. Fabrique Nationale de Herstal (FNH) 303 Launchers that use high-pressure air to deliver kinetic projectiles (similar to a paintball delivery system) with paint marking ability. The system is capable of launching projectiles at a subject up to 60'. It is a less-lethal option to offer law enforcement officers to deliver kinetic energy impacts to subjects in violent encounters. It is also a de-escalation tool used to avoid further injuries or lethal options.

II. (FNH) Kinetic impact rounds used in the FNH launcher are .68 caliber, 8.5 gram, projectiles with non-toxic bismuth in the plastic forward compartment, followed by an indelible paint plastic compartment behind it. The launcher uses compressed air to propel the projectiles. The primary benefits are to provide distance impact less-lethal option and as an alternative to close contact force. Further the munitions provides a lesser force option other than lethal force when appropriate. The munition launcher sends the projectile that creates trauma, distraction, and pain, followed by marking of specific individuals for identification and later arrest. The projectiles have a velocity of 280-350 FPS.

III. Remington 870 less-lethal shotgun is used to deploy the less lethal 12-gauge beanbag round up to a distance of 75 feet. The range of the weapon system helps to maintain space between officers and a suspect reducing the immediacy of the threat which is a principle of De-escalation. These weapons systems are distinguishable by a yellow stock and fore grip. The weapon serves as a less-lethal distance impact weapon causing, pain, distraction, and trauma to violent offenders.

IV. 12-gauge ballistic fiber bag filled with 40 grams of number 9 lead shot, commonly referred to as a beanbag round. This projectile travels at a velocity of 270-290 feet per second (FPS).

V. Defense Technology, 40mm single shot launchers. The 40mm single shot launcher will fire standard 40mm less-lethal impact ammunition, up to 4.8 inches in cartridge length. The 40mm single launcher is not a firearm, but a less-lethal launching system that uses smokeless powder to deliver 40mm projectiles from a safe distance. The less-lethal launcher is capable of launching 40mm munitions at a subject up to 40 yards. The less-lethal launcher is a single launcher, which allows officers to assess after every spent munition.

VI. Defense Technology, 40mm multi-shot launcher. This four-shot launcher is low-profile and lightweight, providing multi-shot capability in a shoulder fire configuration. It contains spring-loaded cylinders that auto-rotate to allow for rapid successive shots without the need to reload. It will discharge many of the 40mm projectiles outlined above.

VII. 40mm munition is a direct impact spin stabilized sponge munition. The sponge munition is used as a Less- Lethal weapon designed to de-escalate a

potentially violent encounter.

b. Purpose

Kinetic projectiles limit the escalation of conflict where employment of lethal force is prohibited, unreasonable, and undesirable. These weapons are proven to reduce the potential for violent confrontations. Kinetic energy projectiles, when used properly, are less likely to result in death or serious physical injury and can be used in an attempt to de-escalate a potentially deadly situation.

c. Authorized Use

Situations for use of the less lethal weapon systems may include, but are not limited to:

- The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved munitions.
  - The suspect has made credible threats to harm themselves or others.
- The suspect is engaged in riotous behavior or is throwing rocks, bottles or other dangerous projectiles at people and/or officers.
  - There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.

d. Expected Lifespan

- I. FNH Launcher, no defined expiration, but until it is no longer serviceable
- II. FNH munitions, five years
- III. Remington 870, no defined expiration, but until it is no longer serviceable
- IV. Ballistic Fiber Bag Munition, five years
- V. 40mm Defense Technology single shot launcher, no defined expiration, but until it is no longer serviceable
- VI. 40mm Defense Technology multi-shot launcher, no defined expiration, but until it is no longer serviceable
- VII. 40mm sponge munition, five years

e. Training

Sworn members must be trained in less-lethal kinetic munitions by POST certified instructors. Proficiency training shall be monitored and documented by a certified, control-device weapons or tactics instructor bi-annually. If an officer cannot demonstrate proficiency with a control device or knowledge of this agency's Use of Force Policy after remedial training, the officer will be restricted from carrying the control device

f. Fiscal Impact

- I. FNH Launchers were originally purchased in 2018 with general fund money. The approximate cost was \$1,300 per launcher. It is estimated that it will cost between 0-\$100 annually to maintain and service the launchers.
- II. FNH Munitions, incur an estimated averaged cost of \$150 annually to replenish
- III. Remington 870 Bean Bag Launchers were initially purchased over 20 years ago as standard issued shotguns. They have since been repurposed to less-lethal shotguns. Their initial cost is approximated at \$500 per weapon and they were purchased using general fund money. It is estimated it will cost between \$0 and \$100 for maintenance base on serviceability.
- IV. Bean Bag Munitions are estimated at \$100 annually base on lifespan and quantities.

V. 40mm launchers were originally purchased over 20 years ago with general fund money. The approximate cost was \$1,000 per launcher. It is estimated that it will cost between 0-\$100 annually to maintain and service the launchers.

VI. 40mm multi-Shot launcher was originally purchased in 2012 with general fund money. The approximate cost was \$1,300. It is estimated that it will cost between 0-\$100 annually to maintain and service the launcher.

VII. 40mm sponge munitions were originally purchased in 2015 with general fund money. The approximate cost was \$27 per munition. It is estimated that it will cost between 0-\$540 annually to maintain a serviceable quantity of these munitions.

g. Legal and Policy Rules

Rules are established under Policy 300, 308, 312.5, 312.5.1, and the SWAT Manual. It is the policy of the Department to utilize the kinetic energy rounds for official law enforcement purposes and according to State and Federal Law such as Penal Code 13652.

**Alameda Police Department 2025 Military Equipment Annual Report**

Inventory of Military Equipment (as of January 21, 2026)

<i>Item</i>	<i>Quantity</i>
<b>Crewless, Remotely Piloted, Powered Ground Vehicle and Aerial Systems</b>	
Ground Vehicle	
Robot	1
Battery	2
Charger	2
Hinge Attachment	1
Manipulator Arm	1
Remote Controller	1
Trailer	1
Aerial System	
Uncrewed Aerial System	2
Battery	6
Battery Charger	2
Infrared Camera	2
Remote Controller	2
Remote Controller Charger	2
Speaker/Microphone	0
Spotlight	2
<b>Armored Personnel Carrier, Vehicle with Entry Apparatus</b>	
Emergency Response Vehicle	1
<b>Specialized Firearms and Ammunition</b>	
Semi-Automatic Rifle	80
Bolt Action Rifle	2
.223 caliber Ammunition	7,088
.308 caliber Ammunition	1,500
<b>Noise-Flash Diversionary Devices</b>	
SAF-Smoke White Grenade (handheld)	2
Large SAF-Smoke White Grenade (handheld)	19
Training Grenade (handheld)	8
Diversionary Device (projectile)	20

<i>Item</i>	<i>Quantity</i>
<b>Munition Containing Tear Gas</b>	
Aerosol OC-V (handheld)	14
Aerosol OC/CS (handheld)	4
Pocket Tactical CS (handheld)	9
Riot Control CS (handheld)	41
Riot Control OC (handheld)	10
40mm Barricade OC/Powder (projectile)	13
40mm Ferret CS/Powder (projectile)	14
40mm Ferret CS/Liquid (projectile)	33
40mm Ferret OC/Powder (projectile)	20
40mm Ferret OC/Liquid (projectile)	38
40mm Muzzle Blast CS (projectile)	43
40mm Muzzle Blast OC (projectile)	25
<b>Kinetic Energy Weapons and Munitions</b>	
FN 303 Launcher	6
FN 303 Munition	1,500
Defense Technology 40mm Multi-Shot Launcher	1
Defense Technology 40mm Single-Shot Launcher	3
40mm Direct Impact Marking Round	65
Remington Model 870 Shotgun	6
Ballistic Fiber Bag	45

Description of Equipment and Maintenance Costs

Crewless, Remotely Piloted, Powered Ground Vehicle and Aerial Systems:

- *Description:*
  - o The Robotex Avatar robot is a remote-controlled, crewless machine that operates on the ground. The robot has stair climbing ability and an arm capable of lifting 65 pounds. The robot features multiple communication options and a chassis that allows for accessories and tool combinations.
  - o The Axon Air Skydio X10 is a remote-controlled, crewless drone that can operate in the air. The drone has an array of attachment options, which greatly enhance mission capabilities. The spotlight payload and the thermal camera give unparalleled situational awareness to the person performing the inspection, both for the safety of flight and the capture of high-quality actionable data to make real-time decisions.
- *Purpose:*
  - o The robot is used to remotely gain visual/audio data, deliver portable phones, open doors, move suspicious packages, and search buildings. The device improves scene intelligence, allowing officers to monitor dangerous areas from a safe place.
  - o The drone is to assist our law enforcement personnel by providing real-time visual intelligence from an aerial perspective. Uncrewed Aerial Systems (UAS) technology will assist in mitigating the use of force, bringing resolution to critical incidents, enhancing public safety, and mitigating overall risk.

- **Authorized Use:**
  - The robot is only used in incidents where officers have the legal authority to search. The use requires approval from the Watch Commander.
  - The drone is only used in incidents for:
    - Public safety and life preservation missions, including barricaded suspects, hostage situations, active shooters, apprehension of armed and dangerous fleeing suspects, and high-risk search warrants,
    - All felony crimes that present a risk to public safety or the safety of officers,
    - Violent misdemeanors,
    - Operational planning (search/arrest warrant service),
    - Sideshow activity, as defined in Vehicle Code Section 23109,
    - Riots,
    - Mass casualty events,
    - Lost or missing persons,
    - Rescue events,
    - Disaster response and recovery,
    - Suspected explosive devices,
    - Fire suppression or investigation,
    - Hazardous material releases,
    - Post-incident crime scene preservation and documentation,
    - Pursuant to a search warrant,
    - Special events where there is intelligence that there is risk to public safety,
    - When there is probable cause to believe that the UAS will record images of a place, thing, condition, or event and that those images tend to show a felony has been committed or tends to show that a particular person has committed a felony,
    - Anti-UAV operations when a person is operating a UAV in a manner that impedes emergency personnel who, in the course of their duties, are coping with an emergency (refer to Penal Code § 402(a)1),
    - Training missions.
    - In support of the Alameda Fire Department when the underlying mission meets the uses outlined in the policy,
    - Mutual Aid support when the underlying mission meets the uses outlined in the policy, or
    - Exigent circumstances, only with supervisory and/or command approval.
- **Lifespan:**
  - Robot: 10+ years.
  - Drone: Until no longer serviceable.
- **Fiscal Impact:**
  - The robot was purchased in 2013 for \$25,000 using grant funds. The annual cost varies depending on the serviceability of the battery.
  - The Drone package was purchased in 2024 for \$124,562.74 using the general fund. The annual cost of licenses is \$4,810.32.
- **Training:**
  - Robot: Operators must complete the Basic SWAT Operator Course.

- Drone: Operators must complete Skydio's training course, an in-person live flight training, and demonstration of foundational knowledge about the Skydio aircraft, preflight, launch, flight skills, landing, postflight, maintenance, and troubleshooting.
- *Legal and Policy Rules:*
  - Robot: Use is established under Policy 408. The robot is to be used for official law enforcement purposes in accordance with state and federal laws.
  - Drone: Use is established under Policy 710. The drone is to be used for official law enforcement purposes in accordance with state and federal laws.

Armored Personnel Carrier, Vehicle with Entry Apparatus Attached:

- *Description:* The Ballistic Armored Tactical Transport Emergency Response Vehicle (ERV) is built on a 2012 Ford F-550 chassis. The ERV provides ballistic protection by withstanding bullet strikes from small arms fire. The ERV is equipped with emergency lights, siren, and a public address system.
- *Purpose:* The ERV is used during critical incidents to enhance officer and community safety, improve scene containment and stabilization, and assist in resolving critical incidents. The main uses are resident and officer rescues, evacuations, and the deployment of officers and approved equipment. The ERV can be used as a de-escalation apparatus that allows close and safe contact with armed persons. The vehicle has a detachable breaching apparatus, which can be affixed to the front bumper. The apparatus can assist in entry where handheld tools are inadequate or ineffective against barricaded individuals.
- *Authorized Use:* The use of the ERV requires approval from the Watch Commander. Approval is granted only under specific circumstances.
- *Lifespan:* 25 years
- *Fiscal Impact:* The ERV was purchased using the general fund in 2013 for \$158,520.94. The annual maintenance costs vary. In 2024, the cost of an emissions test and service maintenance was \$526.14.
- *Training:* All officers are required to undergo training every other year in emergency vehicle operations per POST regulations.
- *Legal and Policy Rules:* Use is established under Policy 409. The ERV is to be used for official law enforcement purposes in accordance with state and federal laws.

Specialized Firearms and Ammunition:

- *Description:*
  - (73) Colt AR-15 semi-automatic rifles are capable of accurately stopping an armed person at various distances. The rifle is outfitted with lighting devices to improve safety and electronic sighting devices to enhance accuracy. The rifle is chambered with .223 caliber ammunition.
  - (2) Bushmaster AR-15 semi-automatic rifles are similar to the Colt AR-15 rifles but come with shorter barrels. The shorter barrel allows SWAT tactical team members to increase their maneuverability during SWAT operations. The rifle is chambered with .223 caliber ammunition.

- (2) ArmaLite 10 semi-automatic rifles are similar to the Colt rifles but have greater stopping power for use in an overwatch capacity. The rifle is chambered with .308 caliber ammunition.
- (2) Sig Sauer SSG 3000 bolt action rifles allow for the acquisition of targets at greater distances.
- (1) Rock River LAR-15 semi-automatic rifles are used only for training. The rifle is chambered in 9mm ammunition.
- (2) Colt AR-15 semi-automatic rifles are used only for training. The rifles are chambered in 9mm ammunition.
- .223 caliber ammunition is used for the Colt and Bushmaster rifles.
- .308 caliber ammunition is used for the ArmaLite and Sig Sauer rifles.
- *Purpose:* All weapons are used to stop a threat with more accuracy and at greater distances than a handgun. They are also used to stop threats posed by people wearing body armor who engage in violence.
- *Authorized Use:*
  - Colt AR-15 rifles can be deployed in any circumstance where an officer can articulate a reasonable expectation that the rifle may be needed. Examples of guidelines for deploying rifles include:
    - Situations where the member reasonably anticipates an armed encounter,
    - When a member is faced with a situation that may require accurate and effective fire at long range,
    - Situations where a member reasonably expects the need to meet or exceed the suspect's firepower,
    - When a member reasonably believes that there may be a need to fire on a barricaded person or a person with a hostage,
    - When a member reasonably believes that a suspect may be wearing body armor,
    - When authorized or requested by a supervisor, or
    - When needed to euthanize an animal.
  - Bushmaster AR-15 rifles can be deployed only by members of the tactical team when the officer can articulate a reasonable expectation that the rifle may be needed.
  - ArmaLite 10 rifles can be deployed only by members of the tactical team. They can be used to protect the community and officers during large events and in tactical situations where it might be necessary to incapacitate vehicles intentionally being used as weapons are outfitted with scoped optics designed for precision.
- *Lifespan:* Until no longer serviceable.
- *Fiscal Impact:*
  - Colt semi-automatic rifles were first purchased in 2002 using the general fund. The approximate cost was \$1,200 per rifle. An additional purchase was made in 2023 using the general fund. The approximate cost was \$1,118 per rifle. The annual cost varies depending on serviceability of the equipment.
  - Bushmaster semi-automatic rifles were purchased in 2010 using the general fund. The annual cost varies depending on serviceability of the equipment.

- One ArmaLite semi-automatic rifle was purchased in 2009, and another was purchased in 2012. Both purchases were made using the general fund. The approximate cost was \$1,844.38 per rifle. The annual cost varies depending on serviceability of the equipment.
- Sig Sauer bolt action rifles were purchased in 2014 using the general fund. The approximate cost was \$1,362.50 per rifle. The annual cost varies depending on serviceability of the equipment.
- .223 caliber ammunition was first purchased in 2002 using the general fund. The department has made additional purchases using the general fund to maintain 60,000 rounds of ammunition. The annual cost of maintaining this supply is \$30,000.
- .308 caliber ammunition was first purchased over 20 years ago using the general fund. The department has made additional purchases using the general fund to maintain 5,000 rounds of ammunition. The annual cost of maintaining this supply is \$7,500.
- *Training:* Officers must be certified by POST instructors in the operation of the rifle and are required to complete quarterly training and pass qualifications that are administered by a certified patrol rifle instructor. The Bushmaster and Sig Sauer rifles can only be used by officers who have successfully completed the POST-approved sniper training.
- *Legal and Policy Rules:* Use is established under Policy 432. The semi-automatic rifles are to be used for official law enforcement purposes in accordance with state and federal laws.

#### Noise-Flash Diversionary Devices:

- *Description:* Combined Tactical Systems model 7290 flash bangs are non-bursting, non-fragmenting devices that produce a loud noise with an intense bright light. The devices produce atmospheric pressure and a brilliant white which can cause short term physiological, psychological, and sensory deprivation.
- *Purpose:* Can serve as a distraction to dangerous suspects during assaults, hostage rescues, room entries, or other high-risk situations.
- *Authorized Use:* The devices shall only be used by officers trained in their proper use in situations such as:
  - Hostage and barricaded subject situations,
  - High-risk warrant services where there may be extreme hazards to officers,
  - During other high-risk situations where their use would enhance officer safety, or
  - During training exercises.
- *Lifespan:* Unlimited.
- *Fiscal Impact:* The devices were purchased over 20 years ago using the general fund. The annual cost of maintaining a serviceable quantity is \$101.89 per munition.
- *Training:* Officers must receive diversionary device training that is conducted by POST certified instructors.

- *Legal and Policy Rules:* Use is established in the SWAT Manual. The diversionary devices are to be used for official law enforcement purposes in accordance with state and federal laws.

#### Munition Containing Tear Gas:

- *Description:*
  - Aerosol OC-V (Oleoresin Capsicum): OC is an agent that causes respiratory inflammation and involuntary closure of the eyes. OC has been endorsed by the Federal Bureau of Investigation and was deregulated in California in 1996 for civilian use and possession. OC vapor aerosol grenades deliver a high concentration of OC in a powerful mist. The device is designed for confined spaces.
  - Aerosol OC/CS: OC/CS vapor aerosol grenades deliver a combination of OC and CS at high concentrations in a powerful mist. The device is designed for confined spaces.
  - Pocket Tactical CS & Riot Control CS: CS (2-Chlorobenzylidenemalononitrile) is an irritant that involuntarily causes the tear ducts to activate. CS has been tested in the United States and is not known to cause allergic reactions. CS grenades emit CS smoke for 20 to 40 seconds through gas ports located on the top of the device.
  - 40mm Barricade OC/Powder: Barricade-penetrating projectiles contain powder OC in a frangible round. The projectile can penetrate windows, hollow core interior doors, and thin plywood. Once fragmented, the projectile emits powdered OC.
  - 40mm Ferret CS Powder: Barricade-penetrating projectiles contain powder CS in a frangible round. The projectile can penetrate windows, hollow core interior doors, and thin plywood. Once fragmented, the projectile emits powdered OC.
  - 40mm Ferret CS/Liquid: Barricade-penetrating projectiles contain liquid CS in a frangible round. The projectile can penetrate windows, hollow core interior doors, and thin plywood. Once fragmented, the projectile emits liquid CS.
  - 40mm Ferret OC Powder: Barricade-penetrating projectiles contain powder OC in a frangible round. The projectile can penetrate windows, hollow core interior doors, and thin plywood. Once fragmented, the projectile emits powder OC.
  - 40mm Ferret OC Liquid: Barricade-penetrating projectiles contain liquid OC in a frangible round. The projectile can penetrate windows, hollow core interior doors, and thin plywood. Once fragmented, the projectile emits liquid OC.
  - 40mm Muzzle Blast CS: Powder dispersion rounds propel powdered CS at short ranges to not exceed 30 feet.
  - 40mm Muzzle Blast OC: Powder dispersion rounds propel powdered OC at short ranges to not exceed 30 feet.
- *Purpose:* Munitions are used as a non-lethal tool to limit the escalation of conflict where the use of lethal force is prohibited or unreasonable.
- *Authorized Use:* Munitions containing tear gas can be used when addressing the following situations:
  - Dangers and/or combative individuals,
  - Barricaded and wanted suspects,

- Riot control,
- Circumstances where a tactical advantage can be achieved,
- Potentially vicious animals, or
- Training exercises or approved demonstrations.
- *Lifespan:*
  - Aerosol OC-V: Five years
  - Aerosol OC/CS: Five years
  - Pocket Tactical CS: Five years
  - Riot Control CS: Five years
  - 40mm Barricade OC/Powder: Five years
  - 40mm Ferret CS Powder: Five years
  - 40mm Ferret CS/Liquid: Five years
  - 40mm Ferret OC Powder: Five years
  - 40mm Ferret OC Liquid: Six years
  - 40mm Muzzle Blast CS: Five years
  - 40mm Muzzle Blast OC: Five years
- *Fiscal Impact:* Alameda Police Department first acquired the above-listed munitions containing tear gas over 20 years ago. The annual cost of maintaining a serviceable quantity is \$25 per projectile.
- *Training:* Officers must receive POST-certified training from certified less-lethal and chemical agent instructors or manufacturer-specific training in the use of chemical agents.
- *Legal and Policy Rules:* Use is established under the SWAT manual. Policy 421 (Civil Disturbances), Policy 308 (Control Techniques and Devices), Policy 709 (Military Equipment), Policy 300 (Use of Force) and Government Code Section 7286(a). The munitions are to be used for official law enforcement purposes in accordance with state and federal laws.

#### Kinetic Energy Weapons and Munitions:

- *Description:*
  - Fabrique Nationale de Herstal (FN) 303 Launchers use high-pressure air to deliver kinetic projectiles with paint-marking ability. The system can launch projectiles up to 60 feet.
  - Kinetic impact rounds are .68 caliber, 8.5 gram projectiles with non-toxic bismuth and an indelible paint plastic compartment.
  - Defense Technology 40mm single-shot launchers fire 40mm less-lethal impact ammunition. The device uses smokeless powder to deliver projectiles up to 40 yards.
  - Defense Technology 40mm multi-shot launchers fire 40mm less-lethal impact ammunition. The device uses smokeless powder to deliver projectiles up to 40 yards.
  - 40mm Direct Impact Marking rounds are crushable foam projectiles that can mark their target.
  - Remington 870 shotguns deploy a 12-gauge less-lethal ballistic fiber bag up to 75 feet.

- Ballistic fiber bags contain 40 grams of number 9 lead shot. The projectile travels at a velocity of 270 to 290 feet per second.
- *Purpose:*
  - FN 303 device: A less-lethal option to deliver kinetic energy impacts at subjects during violent encounters. The device can also be used as a de-escalation tool to avoid injuries or lethal options.
  - FN 303 kinetic impact rounds: Projectiles that can serve as a distraction and momentary pain and can mark specific individuals for identification and later arrest.
  - Defense Technology 40mm single-shot launcher: A less-lethal option to deliver kinetic energy impacts at subjects during violent encounters. The device can also be used as a de-escalation tool to avoid injuries or lethal options.
  - Defense Technology 40mm multi-shot launcher: A less-lethal option to deliver kinetic energy impacts at subjects during violent encounters. The device can also be used as a de-escalation tool to avoid injuries or lethal options.
  - 40mm Direct Impact Marking rounds are projectiles that can serve as a distraction and cause momentary pain and can mark specific individuals for identification and later arrest.
  - Remington 870 shotguns serve as a less-lethal distance impact weapon that can serve as a distraction and cause momentary pain to violent subjects.
  - Ballistic fiber bags are projectiles that can serve as a distraction and cause momentary pain to violent subjects.
- *Authorized Use:* Kinetic energy weapons and munitions can be used when addressing the following situations:
  - The suspect is armed with a weapon, and the tactical circumstances allow for the safe application of approved munitions,
  - The suspect has made credible threats to harm themselves or others,
  - The suspect is engaged in riotous behavior or is throwing rocks, bottles, or other dangerous projectiles at people and/or officers, or
  - There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.
- *Lifespan:*
  - FN 303 launcher: Until no longer serviceable
  - FN 303 projectile: Five years
  - 40mm single-shot launcher: Until no longer serviceable
  - 40mm multi-shot launcher: Until no longer serviceable
  - 40mm Direct Impact Marking round: Five years
  - Remington 870 shotgun: Until no longer serviceable
  - Fiber bag: Five years
- *Fiscal Impact:*
  - FN 303 launchers were purchased in 2018 using the general fund. The approximate cost was \$1,300 per launcher. The annual cost varies depending on serviceability of the equipment.
  - FN 303 projectiles were purchased in 2019 to replenish expired inventory. The annual cost of maintaining a serviceable quantity is \$650.

- 40mm single-shot launchers were purchased over 20 years ago using the general fund. The approximate cost was \$1000 per launcher. The estimated annual cost varies depending on serviceability of the equipment.
- 40mm multi-shot launcher was purchased in 2012 using the general fund. The approximate cost was \$1,300. The estimated annual cost varies depending on serviceability of the equipment.
- 40mm Direct Impact Marking rounds were originally purchased in 2015 using the general fund. The approximate cost was \$27 per munition. The estimated annual cost of maintaining a serviceable quantity is \$31.67 per munition.
- Remington 870 shotguns were purchased over 20 years ago as standard issued shotguns. They have since been repurposed to less-lethal shotguns. The initial cost to purchase the shotguns was approximately \$500 each and they were purchased using the general fund. The estimated annual cost varies depending on serviceability of the equipment.
- Fiber bag munitions: The estimated annual cost of maintaining a serviceable quantity is \$100.
- *Training:* Officers must be trained in less-lethal kinetic munitions by POST certified instructors. Proficiency training shall be monitored and documented by a certified, control-device weapons or tactics instructor biannually.
- *Legal and Policy Rules:* Use is established under Policy 300, 308, 312.5, 312.5.1, and the SWAT Manual. The kinetic energy weapons and munitions are to be used for official law enforcement purposes in accordance with state and federal laws.
